

Custom Series Light Box

Unique as your application!

Special attention is required for many projects. In fact, most of our work requires some customization. It simply is the nature of the business. For over 50 years, we have partnered with clients to plan, design and manufacture customized transparency illuminators and fluorescent lighting fixtures. We want to do the same for you.

We will discuss in detail your project and the immediate objectives. Together, we can detail the type of frame, construction material, wiring, mounting and other options available. Our goal is not to be just another vendor or supplier. We prefer a partnership built on our ability to solve your problems cost effectively.

We guarantee the best prices available. You won't see us at trade shows or in trade publications doing 4-color ads, we want to pass those saving on to you. Call us now. We will not be outbid!

Designers & Manufacturers of Transparency Illuminators & Fluorescent Lighting Fixtures for over 50 years
